

Solar Resiliency Pilot Program Feasibility Application

This application for solar requests specific site information to determine which facilities will be selected for participation, and will serve as your application to participate in the program. More information about this Program can be found in the Program Application Information document, available on DESEU's website (www.energizedelaware.org).

Key considerations for the viability of solar at your site include the age and condition of your roof, available land in close proximity with no plans for future use or environmental restrictions, or any large unshaded parking lots of 75 spaces or more. Typically roofs 10 years or older in age or problematic roofs are not viable candidates as they may require roofing related work over the service life of a solar system.

If you are interested in applying please fill out this application and return it with a questionnaire completed for each facility where you have an interest. You may return your completed questionnaire by email at information@deseu-solar.com or by fax at 732-296-0799.

Your response must be filed by MARCH 4, 2015 to be considered.

Thank you for your interest!

Solar Resiliency Pilot Program Facility Questionnaire

Delaware
Sustainable Energy Utility

Please print and complete one questionnaire for each facility where you have an interest in participating.

Facility Name: _____

Physical Address: _____

Roof Information: [only roof areas under 10 years of age or being replaced within 1 year will be considered]

What is the approximate Square Footage of the roof: _____

Describe the roof type: Built-Up _____ Metal Standing Seam _____ EPDM _____ Other _____

Briefly describe the condition of the roof: _____

List the roof manufacturer and term of warrantee: _____

Ground Information: [only un-used and un-shaded land areas of 1 acre or greater will be considered]

Does this open site have any environmental restrictions, such as wetlands, preserved lands, flood hazards or any sloping or topographic restrictions: Yes _____ No _____

Is this site visible or adjacent to residential properties: Yes _____ No _____

Parking Lot Information: [only for unshaded parking lots with a minimum of 75 spaces will be considered]

Are the parking spaces in a north-south orientation: Yes _____ No _____

Emergency Power Information: [please fill in or check where applicable]

Does the site have an emergency source of back-up power such as a natural gas, propane or diesel generator on site: Yes _____ No _____

If yes, what type of critical loads does the emergency generator support during an outage? Is the back-up generation sufficient to serve your emergency loads or are there additional emergency loads that could be served? Please specify in the space below:

Electric Usage Information: [please fill in or check where applicable]

What is the approximate annual electric usage of the site: _____ kWh/year

Please attach a copy of each page of the most recent electricity bill for this site. If unable to locate or attach a recent electricity bill, please answer the following questions:

What electric utility company services the site: _____ Tariff Rate Class: _____

Please return a single application page with the completed questionnaire(s) for each facility by March 4, 2015.
